

Send a Notification

Learn how to send school wide notifications in just a few simple steps

Written by Sanket Haval | Last published at: February 18, 2026

A Notification is used for important, school-wide announcements such as:

- **School closures**
- **Weather warnings**
- **Exam information**
- **Major updates**

Keeping **News** and **Notifications** as separate feeds helps parents clearly distinguish between **important, urgent announcements** and **positive, “nice to know” updates**, making communication easier to prioritise and more effective overall.

Notifications are public posts within the app.

This means:

- They are visible to all registered users on the school app
- They are not private messages
- They should not be used for individual or confidential communication

Use Notifications for information that applies to the wider school community.

Creating & Sending a Notification

Follow the steps below to create and publish a Notification in the app.

1. Go to Manage Notifications

- Go to uniqueschoolapp.ie and login
 - Under **Communications** go to **Notifications**
 - From the dropdown, select **Manage Notifications**
 - Click **Add** to create a new notification
-

2. Enter Title & Message

- Add a **Title** (this appears as the headline)
 - Enter the **Message content**
-

3. Send as Push Notification (Device Alert)

- Tick **Send as Push Notification**
- Select who should receive the alert, e.g. *Parents of 2nd Year*
- Only selected users will receive the alert, but the notification will still be visible to all app users.

If you **untick** this box:

- No one receives a beep
 - The notification still appears in the app feed for everyone to see
-

4. Add to a Category (Optional)

- Click the **Category dropdown**
- Select the category where the notification should appear

The notifications feed can be split into sub-categories e.g. Closures, Attendance, Parent Teacher Meetings etc. to display only relevant content in each category.

5. Add Images (Optional – Highly Recommended)

Images increase engagement.

To add images:

- Click **Choose Files**
- Select images from the [Cloud Cam](#) and click **OK**

To upload new images:

- Click **Browse Files**
 - Select from your device
 - Click **Upload**
 - Select the newly added images and click **OK**
-

6. Add Video (Optional)

If the **Video** is **unavailable**, you must complete the **Vimeo integration here first**.

To add video:

- Click **Choose Videos**
- Select images from the **Library** and click **OK**

To upload new images:

- Click **Browse Video**
- Select from your device
- Click **Upload**
- Select the newly added video and click **OK**

[See more on Video here](#)

7. Add a PDF (Optional)

Recommended only for:

- Official Department documents
- Exam results

If the PDF was created internally, copy and paste the content into the message instead. This ensures it is **mobile responsive** and easier for parents to read.

To upload:

- Click **Upload PDF**
- Select from your device

You can add **up to 2 PDFs** per notification.

8. Schedule & Archive (Optional)

You can control when the notification appears and when it is removed.

To Schedule:

- Click **Schedule Date**
- Select a future date and time

To Archive:

- Click **Unpublish Date**
- Select the date the notification should be removed from the feed

If no Unpublish Date is selected, the notification will automatically expire after **60 days**.

9. Redirect To (Optional)

Creates a button link to a specified area in the app for the parents.

- Click the **Redirect To dropdown**
- Select the relevant section (e.g. Forms)

This improves navigation and user experience.

10. Post to Social Media (Optional)

You can automatically post to:

- **Facebook** (up to 50 images)
- **X (Twitter)** (280 character limit)
- **School Website**

Contact us directly [via email](#) if you wish to get your social media/website integrated.

For X (Twitter) use:

- **Copy Title**
- **Copy Message**

To quickly populate your posts.

11. Send as SMS (Optional)

Tick **SMS** to notify non-app users.

They will receive:

- The **Title** via text
 - A link/prompt to download the app
-

12. Click Send

Click **Send** to publish the notification to the app & socials if selected.
