

Notification Categories

Learn how to create notification categories for efficient organisation

Written by Sanket Haval | Last published at: July 10, 2024

The Notifications feed can be split into sub-categories e.g. Meetings, Trips, Procedures etc. to display only relevant content in each category. Some schools like to sub-categorise each year so parents and guardians can easily see what's relevant to their student.

Adding a Notification Category

1. From your **Dashboard**, Click **Notifications** on the left side menu
2. Go to **Notification Categories**
3. Click **Add**
4. Under the **Notification Category** field, add the **Title**
5. Choose the **Sort Order**
 - **Sort Order** applies to where the category will display across the top of the feed
 - If 1st Year is 7 in the Sort Order and 2nd Year is 6, 1st Year will display before 2nd Year
6. **Submit**

Once submitted, Categories can be applied to Notifications. [Learn more about Notifications](#)
